

Topic: An interview of college entrance examination

What we each does:

Nick: Producer

Chinese Name: Chen Junzhou

Teague: Interviewee

Chinese Name: Tong Xinhao

Charlie: Interviewer

Chinese Name: Zhao Yilun

Start by Nick: Hello everyone, today we are going to have an interview. The topic is about a special part of college entrance examination. In China it is called “Sanweiyiti”.

I am the producer Nick, this is the interviewer, Charlie, and this is the interviewee, Teague. Charlie is a teacher from ZJ university and Teague is a newly graduated high school student willing to study in ZJ university. Now let the interview start.

(Here C represents Charlie and T represent Teague)

T: (Knock the door)

C: Please come in.

T: (Bow and sit down)

C: Hi Teague, I’ve read your materials carefully and I’m amazed that you did really well in your high school! I’m willing to accept you as my student. So, don’t be nervous, I just want to talk with you in ease. Professor Li said that it’s the rule that every student who attend the exam should introduce himself. So, could you please introduce yourself briefly again?

T: My name is Teague, and my Chinese name is Tong Xinhao. I’m from Zhejiang Jinhua, I am 18 years old, graduated from Jinhua No.1 Senior High School.

C: I noticed that you choose ECE as your dream major. It is amazing that I think you

are good enough to go to Peking University. So why do you choose this major and come to our campus?

T: Because Zhejiang University is one of the best universities in China, what's more, studying in Zhejiang University is my dream since I was in primary school. Computer is what I love, and 21-century is computer's time; thus, I choose computer as my major. And one important reason is that Zhejiang University is not far away from my home.

C: What's your hobby or what do you prefer to do to relax yourself?

T: I like to do some sports when I have pressure. I read some detective novels as a kind of entertainment as well. Another way to relax myself is playing some games.

C: I notice that you said you like playing games, what kinds of games do you, a good student play?

T: Logical games, such as chess, werewolf...

C: The games you like is different from others', because you know, computer games are what most of the students like best. Why do you like this kind of games?

T: I think they are interesting and more challenging, I love to challenge. They help me think more logically, and help me build a rational mind, which is important in learning mathematics and physics.

C: Do you think these games have some relationships or similarities with the major you choose?

T: Yes! They really do. One of good strategies to win logical games is to divide it into small blocks and solve each of them one by one. Computer programs are

divided into small blocks as well, and they are in some difficult logics as well. I think playing logical games is good for writing computer programs.

C: Some students think the life of university is not as free as they imagined. And maybe you don't have enough time to do what you like if you come to our campus. So how will you balance your study and entertainment if you study in our campus and feel under high pressure later?

T: I think it is an ability to balance study and entertainment for a student. I think I have the ability to ensure there are enough time I can relax myself, even if the study task is really heavy. That means I will not forgo the time which I should have fun. I think I can balance study and entertainment well in the university.

C: Oh, very good. Thank you, Teague. You are an outstanding student. Hope to meet you in our campus. Bye!
